

ENGINEERING / TECHNOLOGY

Software Test Engineer IoT (m/f) 5123597

- ✓ **Job location: Jenbach, Austria**
- ✓ **Job level: Entry Level**

✓ **At INNIO we are:**

The digital engineering team and are driving the digital transformation for our business. We develop cloud-based software solutions and build out new software architectures for our company. Currently, we are looking for motivated software test engineers to join our team. Take the chance & apply!

✓ **At INNIO, we offer you:**

- ✓ Fun and flexible work environment
- ✓ Cutting-edge and innovative technology
- ✓ Working directly with the products
- ✓ Great opportunities to grow and build your engineering career network
- ✓ And a multi award-winning canteen

✓ **In this position, you will be responsible for:**

- ✓ Design and develop functional and non-functional tests for web applications
- ✓ Define the setup and the tools for automated software testing for a scaled cloud-based web application
- ✓ Strong focus on CI / CD for a seamless deployment process for multiple components and multiple scrum teams
- ✓ Interact with the Development and Product management teams on test definition and coverage tracking
- ✓ Coordinate and report automated test run for multiple software releases per year, including capacity and time estimations

Your profile:

- ✓ Bachelors / Master's degree (or equivalent) in Computer Science or any other related degree
- ✓ Experience with development of automated software tests using Selenium, Jenkins, etc.
- ✓ Experience in test management and bug tracking software applications
- ✓ Strong interpersonal skills to interact with local and distributed development teams

Jenbacher & Waukesha

gas engines

By combining a rich legacy in the power and gas compression space with pioneering technology, INNIO brings our customers affordable, reliable and sustainable energy solutions for today—and tomorrow. We are helping to meet today's energy needs with 64 GW of installed capacity and 48,000 of our powerful Jenbacher and Waukesha engines, which can be found in more than 100 countries. And, by harnessing our history of energy industry firsts along with the power of digital innovation, we will continue to deliver for the future.

This position is based at INNIO's headquarters in the center of the Alps, in Tyrol—a region that provides a variety of recreational opportunities and a high quality of life. As an Equal Opportunity Employer, INNIO offers a comprehensive array of international career opportunities and understands that diversity creates excellence. Known for leadership development, we aim to empower individuals to reach their full potential.

We put great emphasis on providing our employees with recognition, flexibility, competitive and fair compensation, as well as numerous other benefits. According to Austrian law, job postings need to include the minimum salary for a position. For this position, the minimum salary based on the collective agreement is EUR 2.883,03 gross per month. We will be pleased to discuss the appropriate effective salary based on your qualifications and experience.

**It's time to take engines to a place no one else can.
Welcome to a World of Innovation and Inspiration! Welcome to INNIO!**
